Hotspot Shield creates a virtual private network (VPN) between the laptop and the wireless router. This impenetrable tunnel prevents spies and hackers from viewing your email, instant messaging, credit card information or anything else you send wirelessly. This means that you remain anonymous and protect your privacy. Every time you browse the Web, you expose yourself and your devices to numerous online threats and risks; Hackers can steal your passwords and financial information, and the sites you visit may contain malware. Hotspot Shield VPN software uses advanced encryption technology to protect the browsing, detection and blocking of malware, and allows you to access your favorite content from anywhere. You can even bypass geo-restrictions to unlock Facebook, unlock Youtube or unlock any website in countries that censor content. Our HOTSPOT Shield VPN service also protects your IP address, allowing you to browse the web anonymously and confidentially. Features: Protect your web session, data, online shopping, and personal information online with HTTPS encryption. Protect yourself from identity theft online. Hide your IP address for online privacy. Access to all content privately without censorship; bypass firewalls. Protect yourself from spies in Wi-Fi hotspots, hotels, airports, corporate offices. Works on both wireless and wired connections. Provides unlimited bandwidth. Hotspot Shield is a special type of virtual private network that can be used to secure an Internet connection, especially in unprotected networks. Although there are many different VPN options, this is fast becoming one of the most popular because it protects information from tracking or accessing third parties. There are several different advantages to using this software, such as being able to use websites that are blocked by regular servers. Users can also enjoy private web browsing and increased security, which provides extra peace of mind for people who use the Internet for banking and want to keep their passwords safe. A free version of the software is available and offers users a large number of very useful features. However, the free version is supported by advertising, and people who choose this version will find a banner at the top of the screen, as well as a button urging them to subscribe to the Elite version. It's a full version and comes complete with all the useful features, although you have to pay a small fee. Users can pay monthly, every six months, annually or go for a single payment to unlock special features such as unlimited bandwidth, unlimited access, no advertising and special support. People who are looking for a safe and secure virtual private network are more likely to be reminded that Hotspot Shield is one of the best options around. This is because it boasts features that actually block third parties and prevents them from accessing the information of people who use VPNs. You don't have to create an account to use the free version of the software, just download it from a dedicated website. However, people who want to use the Elite version will have to create an account by inging their name, email address and payment details. When the software works, A VPN will appear at the top of the screen. If you don't, turn off the software and open the Internet Options menu, tick automatically detect settings in LAN settings and restart the software and VPN logo must now appear. There is no bandwidth for those who choose Hotspot Shield Elite. People who use Software versions are provided with a bandwidth limit of 500MB per day due to the high costs that are generated from certain types of content, such as video streaming sites. Android and iOS users can install software on their smartphones or tablets using special apps that have been created. They can be found in Apple's App Store and Google Play Store and are free and easy to download and install. It's one of the fastest and most effective VPNs around and regularly makes it into the top ten VPN list to choose from. The fact that Hotspot Shield comes with a great bandwidth limit for free and the ability to unlock all types of websites makes it extremely useful and powerful. ArticleRead moreSponsoredRead moreNewsRead moreGamingRead is a simpler setup. Just open the app and connect to the click, you are free to use the Internet.
